Montevideo, Uruguay (Open to relocation)

Nationality: Italian, Uruguayan

ABOUT ME

As a computer engineer, I've learned to work in teams across a wide variety of projects. Responsibility is one of my core strengths, and I'm able to take on leadership roles when needed. I consider myself a creative and curious person who isn't satisfied with the bare minimum, but instead strives to innovate and go beyond the conventional.

WORK EXPERIENCE

Process Analyst at Banco Santander - CINOI

May 2025 – Present | Montevideo, Uruguay

- Requirements gathering and functional analysis with internal clients, translating business needs into BPM-based technical solutions.
- Design, development, and maintenance of workflows on the Integradoc platform.
- Testing, documentation, and continuous optimization of existing processes.
- Process automation using Microsoft Power Platform (Power Automate, Power Apps).

Intern at Quantum-South

February 2023 – April 2023 | Montevideo, Uruguay

- Execution of automated tests on an application in development, using Python.
- Documentation and tracking of software defects in collaboration with the development team.
- Development of automated test cases and execution of regression tests.

UNIVERSITY STUDIES

Computer Engineering

- Universidad de Montevideo - School of Engineering (2022 – 2026)
- Universidad de la República (2020 – 2021)

Technische Informatik - International Exchange in Germany

- Ostbayerische Technische Hochschule Regensburg (September 2024 – February 2025)

PRE-UNIVERSITY STUDIES

Scuola Italiana di Montevideo

- Italian Baccalaureate, Scientific Track - Recognized throughout the European Union (2016 – 2019)
- Final exam: “Exame de Estado conclusivo degli studi di istruzione secondaria di secondo grado nell'indirizzo: Liceo Scientifico” (2019)

TECHNICAL SKILLS

- **Frontend & UI/UX:** React, Next.js, React Native, TypeScript, JavaScript
- **Backend & Cloud (AWS):** Python, Java (Spring Boot), AWS Lambda, API Gateway, Amazon Cognito, CloudFront, S3, RDS, DynamoDB, VPC, SQS, REST APIs
- **Databases & Data:** PostgreSQL, MySQL, SQL, Pandas, NumPy, Scikit-learn
- **Tools:** Git, GitHub, Figma, Postman
- **Software Engineering:** Software Testing, Technical Documentation, Agile, BPM, Functional Analysis

LANGUAGES

- Spanish - Native
- English - C2 (ECPE)
- Italian - C1 (CELI)
- German - B1

FEATURED PROJECTS

OrderHub — Food Marketplace (Capstone Project)

Universidad de Montevideo | 3-member team | August 2025 – March 2026

- Development of the full web frontend using React, Next.js, and TypeScript.
- End-to-end UX design in Figma.
- Integration of REST APIs, authentication via Google OAuth, and multilingual internationalization (i18n).
- Development of a Machine Learning-based recommendation system: dataset cleaning and preparation, model training, and integration of results with the rest of the components.

IoT Platform for Smart Access Control (Course Project)

Universidad de Montevideo | 4-member team | March 2025 – June 2025

- Design and deployment of all serverless services in the system (Lambda, API Gateway, Cognito, SQS, RDS, S3, CloudFront, IoT Core), plus implementation of communication with the IoT device.
- Backend development using AWS Lambda, implementing all CRUD operations and system management logic (users, access points, RFID assignment).
- Development of the facial recognition engine: image processing, feature vector comparison, and threshold-based identity verification.

E-Stats — Sports Match Management App (Personal Project)

January – March 2024

- Design and development of a mobile app for managing sports matches, using React Native, Next.js, and MySQL.
- Implementation of real-time event logging, live scoreboards, and standings management.
- Development of player management, role-based permissions, and email notifications.
